Subject: Microsoft Settlement

I am writing to add my statement that I think the proposed Microsoft settlement is an EXTREMELY bad idea. It is quite obvious to me that Microsoft is demonstrating that it is exactly the monopoly that it was proved to be in federal court. I see daily signs of how MS want monopolize further areas of current markets and push its products and ideas onto the PC, music, broadband, and gaming markets. I really urge you to consider a severe judgment in this case. I do not want to see a country under the rule of MS and its will.
